

# Quick Start for Verizon Jetpack

This Jetpack has been provided for live video visits. You will need to connect your device to this Jetpack.

To begin:

- Charge the device with the enclosed charger. The charging indicator will be red when charging and green when fully charged.
- Turn on device by pressing and holding the power button for 2 seconds. The power indicator will blink or be solid white when powered on.
- Using the WiFi settings on your device, connect to the network listed on the bottom of the Jetpack.
- Your device should remain connected to the Jetpack. If it does not, repeat steps above.

Quick Tips for participating in live video visits:

- Prop your device somewhere safe and steady for the session. It is difficult to see if the device is being moved or carried.
- Teletherapy sessions often include some observation of you playing with or completing a task with your child. They also often include some coaching or problem solving between the parent/caregiver and the EI provider/therapist.
- Feel free to ask your EI provider/therapist questions or let them know if there is something specific that you want to work on or need help with.
